

Position Title: Equipment Operator - Snow Removal

Main Functions: The Equipment Operator Snow Removal position works closely with the Mountain Manager to safely and efficiently remove snow from Anthony Lakes' designated areas, including 15 miles of FS 73 and parking areas. This position requires early morning hours, driving in low visibility situations and variable weather conditions.

Reports To: Mountain Manager

Duties:

- Responsible for the safe, timely, and quality removal of snow
- Coordinates with Mountain Manager daily for safe snow removal plans
- Helps in vehicle maintenance; performs routine daily and weekly operational inspections and maintenance on loader, grader, other snow removal equipment, and grooming vehicles
- Completes daily operating documentation accurately and legibly
- Efficiently maintains Road Log Hours, Maintenance Records, and Fuel Logs for all snow removal equipment
- Reports to work on time, as scheduled, and on-call basis
- Recognizes and reports hazardous conditions
- Evaluates and reports hazardous weather conditions
- Complies with Anthony Lakes and departmental policies and procedures
- Promotes guest and worker safety consciousness with respect to job duties and responsibilities
- Assumes all other responsibilities assigned
- Maintains a clean, safe, and organized work area
- Complies and adheres to Anthony Lakes' policies and procedures
- Assumes all other responsibilities assigned by Mountain Manager

Employment Requirements:

- Minimum of 18 years of age (Oregon state law)
- Possess a Commercial License to Drive (CDL)
- Grader operation experience preferred
- One to three years of related experience
- Available to work as-needed/on-call basis
- Ability to lift 100lbs
- Ability to work in cold weather; walk in and on snow and ice on a regular basis
- Ability to read, and interpret documents such as operating and maintenance instructions and procedure manuals
- Ability to write routine reports, and correspondence
